

On Dekelias Street 12A, in one of the most beautiful streets of Ekali, and on a plot of 1,830 sqm, two luxurious residences are being constructed, which stand out for their combination of high aesthetics and efficient functionality.

The construction is carried out with the strictest criteria, respecting both humans and the environment. The selection of worthy and experienced partners, along with the use of modern technological equipment that guarantees the perfection and reliability of every construction down to the last detail, as they were deemed absolutely necessary.

The architectural firm Zeppos-Georgiadi and Associates, with a dynamic presence in the field of modern housing and specialized departments in interior architecture and landscape architecture, has undertaken the architectural design of the residences located in an exceptionally privileged location, amidst lush green surroundings.

Residence 12A.2 is located at the rear of the plot and has a total area of 710 square meters, of which 320 square meters are for primary use, consisting of four levels.

The first level - Basement B - covers an area of 271.16 square meters and accommodates the residence's parking spaces, mechanical equipment, laundry facilities, toilets, and storage areas in a separate space.

The second level - Basement A - covers 189.24 square meters, and part of this space can be used for primary purposes. On this level, you will find the playroom, gym, toilet, guest room, two bathrooms, storage areas, and a room for staff with a bathroom and kitchenette.

The ground floor has a total area of 127.52 square meters and includes a dining room, kitchen, living room, toilet, and storage room.

The first floor covers 121.97 sqm and consists of three master bedrooms.

The private garden is 563 sqm.

The swimming pool is 55 sqm.
